## About me

---

I am a 4<sup>th</sup> year physics student studying at the **National Institute of Science Education and Research, Bhubaneswar, India**. I am interested in quantum physics & quantum computing with its application in the field of science and technology.

**Nationality:** Indian

## Education

---

- **National Institute of Science Education and Research (NISER)** Bhubaneswar, India  
*Integrated Master's (CGPA till 6<sup>th</sup> semester: 9.13/10.0)* 2018 - 2023
- **Maharishi Vidya Mandir Senior Sec. School** Chennai, India  
*All India Senior Secondary Certificate Examination (CBSE) - 95.6%* May 2018
- **PSG Public School** Coimbatore, India  
*All India Secondary School Examination (CBSE) - CGPA 10* May 2016

## Honors/Awards

---

- **Qiskit Advocate** 2021  
*IBM Quantum*
  - Selected within a pool of global applicants.
  - This achievement depicts a deep level of understanding with Qiskit including circuits, algorithms, simulators, qubits and noise.
  - Through my contributions to the Qiskit and the quantum community, I have demonstrated an ability and commitment to educate and influence others by sharing ideas, knowledge and expertise in the field of quantum computing.
- **National Graduate Physics Examination (National topper)** 2020  
*Indian Association of Physics Teachers*
  - Secured a score within the top 118 students among 12,000 candidates in the country.
- **Department Topper (1<sup>st</sup> & 2<sup>nd</sup> year)** 2018-2020  
*School of Physical Sciences, NISER*
- **Kishore Vaigyanik Protsahan Yojana** 2017  
*Indian Institute of Science* Bengaluru, India
  - A prestigious fellowship program funded by the *Department of Science and Technology* of the Government of India.
- **National Talent Search Examination** 2016  
*National Council of Education Research and Training* New Delhi, India
  - A national level scholarship program offered by the Government of India.
  - It is one of the oldest and most prestigious scholarship programmes in the country.

## Academic exposure

---

- **Qiskit Global Summer School** Virtual  
*IBM Quantum* July-August 2020

- An intensive 2 week virtual summer school on quantum computation and designing quantum circuits and algorithms using Qiskit.
- Did hands-on coding exercises to learn various quantum algorithms, pulse level control of qubits and concepts in quantum chemistry.
- Also did a project on simulating the ground energy level of LiH molecule using quantum variational eigensolver.

- **National Initiative on Undergraduate Science (Physics)** Mumbai, Maharashtra  
*Homi Bhabha Centre for Science Education, TIFR* *June 2019*
  - Selected as one of top 70 students in the country to participate in this camp.
  - An extensive 12-day course containing lectures, independent lab work and a field trip for 2 days.
  - Lecture series on quantum mechanics, quantum information theory and quantum computation, basic condensed matter physics, many body physics, astronomy and astrophysics.
  - About 30 hours of independent lab work.

## Project experience

---

- **Research Assistant** Bhubaneswar, India  
*Superconducting spintronics group, NISER* *April - July 2021*
  - Project guide: Dr. Kartik Senapati, Reader-F, NISER
  - Worked on a semester project on the topic, "Study of spin current in NM/HM bilayer system".
  - The goal was to be able to detect spin current via a bilayer system involving Cu and Pt, using the method of electrical detection.
- **Software Developer Intern** Remote  
*Quantum Brilliance, Australia* *February - April 2021*
  - Project guide: Dr. Nariman Saadatmand, QBQE Product Manager
  - Worked on QB's quantum emulator (QBQE) and enhanced functionality of its QAOA module using C++.
- **Research Intern** Bhubaneswar, India  
*Institute of Physics, Bhubaneswar* *May - June 2019*
  - Project guide: Dr. Debakanta Samal, Reader-F, Institute of Physics
  - Reading project on "Study on anisotropic magnetoresistance".
  - Topics covered: Origin of magnetoresistance, theory of magnetoresistance in real metals using the 2-band charge carrier model, origin of anisotropic magnetoresistance, its applications and current research scenario in the field.

## Open-source contributions

---

- **Qiskit Textbook** [GitHub](#)  
*Learn Quantum Computation using Qiskit* *April 2020 - Present*
  - Qiskit is IBM's software development kit for building software to interact with IBM's quantum devices and OpenQASM.
  - The textbook is equivalent to a university level course for learning quantum computation and beyond.
  - I have been an active contributor to this project with over 50+ commits since April 2020.

## Licenses & Certifications

---

- **IBM Certified Associate Developer** IBM  
*Quantum Computation using Qiskit v0.2X* *July 2021*

- This certification demonstrates fundamental knowledge of quantum computing concepts and the ability to express them using the Qiskit open source software development kit (SDK).
- Shows experience in using the Qiskit SDK from the Python programming language to create and execute quantum computing programs on IBM Quantum computers and simulators.

- **Introduction to Quantum Computing Course**

*IBM Quantum & The Coding School*

Qubit by Qubit  
October 2020 - May 2021

- Developed a foundational understanding of quantum computing, with topics including introductory linear algebra, coding with Qiskit, quantum mechanics, quantum algorithms, and quantum applications.

- **Challenge Fall 2020 Achievement - Intermediate**

*IBM Quantum*

IBM  
December 2020

- Demonstrated an ability to implement near-future quantum data structures and design a quantum game solver using Grover's algorithm.
- Showed an understanding of quantum circuits, the gates that comprise such circuits, Grover's algorithm, and qRAM (quantum random access memory) as a way to implement complex data structures.

- **CS-191x: Quantum Mechanics and Quantum Computation**

*University of California, Berkeley*

edX  
August 2020

- Coursework involved ranging from the basics of the qubit to quantum algorithms such as Grover's, Shor's etc. to the Bloch sphere and Schrödinger's wave equation.
- Final score: 97%

## Volunteering

---

- **Project Lovelace**

*Scientific programming problems*

*May 2021 - Present*

- Project Lovelace is a platform to learn science through programming.
- Member of the team to add new problems and maintain the website (both frontend and backend).
- Website: <https://projectlovelace.net>

- **Full-Stack Quantum Computation**

*Community-driven, open-source education resources*

*December 2020 - Present*

- Part of the team as a curator of various articles on quantum technologies, submitted by volunteers.
- Website: <https://fullstackquantumcomputation.tech>

- **Mentor**

*Avanti Fellows NGO*

*January - April 2019*

- Duties included mentoring students from grades 11 and 12.
- My weekend work involved having a one-to-one discussion with students on physics and general advice on entrance exams.

## Technical skills

---

### Programming and scripting languages

Julia, C, C++, Bash, and Python (Libraries: *Scipy*, *Numpy*, *Matplotlib*, *Sympy*)

### Markup languages

L<sup>A</sup>T<sub>E</sub>X, Markdown, Groff, HTML

## Quantum Frameworks

Qiskit, QuTiP, PennyLane

## General computing tools

Vim, git, tmux, gnuplot
